

EasyQ is a powerful Learning Management System add-on that can be either embedded in your LMS or integrated using our cloud based service. It allows users to create customized web-based and SCORM 2004 compliant quizzes and surveys around their own course materials. Quizzes or surveys are created in minutes and are available online to students.

Instructors can create online quizzes, tests, and activities. Each response can have a specific score value, and immediate feedback and custom explanations can be provided. Teachers can access results as email, sent to a SCORM compliant Database, or in an Excel sheet format.

## Quiz

The EasyDash component is a perfect choice for both SQL beginners and experienced query writers. It renders all SQL features, such as sub-queries and unions, very easy to accomplish and provides the professional user with everything he or she needs to efficiently work with SQL queries. The interface of EasyDash is similar to MS Access and SQL Server's visual query building interface, so it is already familiar to most database users.

By embedding or integrating EasyDash into your product, you can make it easy for beginners and provide a powerful tool for professionals.

### Powerful Quiz Administration

- ▶ Set up a cheating-prevented exam with time limit, question randomization and answer shuffle.
- ▶ Create a protected quiz by domain hosting limit, password or build-in accounts
- ▶ Measure performance with partial scoring scheme or score-based grading system
- ▶ Provide feedback for answer/ question/ quiz or instant report on tests
- ▶ Automatic Quiz Results Tracking all quiz data including answers, scores and participants can be sent to the LMS easily
- ▶ Smart Quiz Statistic Reporting Instructors can easily access to view all quizzes with detailed questions, answers, scores and other participants' performance, and manage all quiz contents and all quiz participants in arrangement as needed.
- ▶ Embed/ Integrate EasyQ can be either embedded into you current application or can be integrated using a cloud based service
- ▶ Multiple Question types including multiple choice, true/ false, drag and drop, fill in the blanks etc.

## Survey

Replace your traditional low-tech, paper-based or phone-based data collection methods with a real time web-based survey system. In minutes, and using the speed and flexibility of the Internet, create, edit, and field professional marketing research web surveys to your audience using your browser.

Eliminate the need for expensive software, network administration, and programming expertise. Host the software on your own server or use MindGrid's EasyQ Cloud service. With the most attractive feature-to-price ratio in the industry, EasyQ can dramatically reduce your research collection costs.

### Key Features

- ▶ Unlimited number of questions, answers and surveys Real-time Refresh
- ▶ Quick and simple survey builder
- ▶ Downloadable results (MS Word, Open office)
- ▶ Question builder with question preview & spell checker
- ▶ Multiple choice matrix questions
