MINDGRID

RediLearning – Learning Management system

Executive Summary

RediLearning is the one of the fastest growing compliance training solutions company. RediLearning Senior Care solutions represent a substantial advancement in the mission to achieve 100% Staff Training survey-readiness every day, due to the following key factors:

- Proprietary Learning Management System (LMS);
- Professionally Researched and Written Content;
- Multimedia Learning Process and Techniques.

RediLearning's comprehensive solutions-approach is also a strategic plan to improve staff competency with greater efficiency, performance, economy, loyalty and risk mitigation.

MindGrid is the preferred as the technology partner for Developing, enhancing, support, testing and administration of the RediLearning Learning Management System (LMS) from inception till date and the MindGrid team has put in over 200 person months of development, enhancement, support and testing effort. MindGrid also added value to RediLearning's LMS by conceptualizing, designing and developing the complete system system. We continue to add value by working with RediLearning as an extended team that not only is a technology partner but also a strategic one. Peak team size that worked on this project from MindGrid was 7 people for development and 3 for testing.

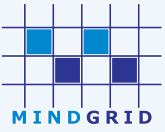

The Problem

RediLearning was not only searching for a skilled cost effective offshore testing and development partner to design and develop its LMS solution but also a partner with expertise in the learning and training domain.

RediLearning was seeking to engage a Development and Testing Partner to perform design develop and test the above system. The system was expected to meet the following criteria:

- Easy enrollment that, with just a few bits of information, RediLearning is able to automatically specify the required courses for each position and staff member
- Simplified tracking of each student's progress in every course, performance on quizzes and tests all the way through to completion
- Streamlined reporting that allows, with a few clicks, to generate all of the management information needed to prepare for survey

Development Partner was expected to quickly ramp-up the team and commit to deliveries under tight time-lines.

RediLearning – Learning Management system

How we helped

Based on high level requirements from **RediLearning**, **MindGrid** offered to:

- Work with RediLearning's team and develop detailed requirements
- Design a highly flexible and intuitive and usable system
- Deploy a skilled team
- Ensure that back-up for any contingency is planned for

MindGrid team worked very closely with the RediLearning team and through the scheduled reviews and other communication mechanisms ensured timely implementation of the testing and development activities including all the identified deliverables.

MindGrid's approach included the following:

- **Partner with RediLearning to ensure success for the Project as per their Business Plans**
 - Keep Open/Transparent Communications Channels
 - Regular scheduled progress review meetings and reports
- **Identify all possible risks early**
 - Plan to mitigate risks by attacking the High Risks first
- **Ensure Quality through both, development and QA lifecycle**
 - Involvement of QA personnel from requirements phase
 - Adherence to defined processes
 - Involvement of MindGrid top management
- **Controlled Acceptance and hand-over**
 - Frequent iterative releases and acceptance

The RediLearning LMS is developed on cutting-edge Microsoft technologies that included C#, .NET framework, SQL server and MS SQL Reporting Services.
